One of the most famous ones is RummyCircle, one of the greatest rummy communities in the world that brings together millions of users, not only to learn and become experts in any of its versions (14 or 21 cards) but also to win money as if they were playing online poker. Card game with which you can win loads of money! In fact, how it works is very similar to any other app of the same nature. Once we download its APK and we've completed its tutorial, we can access any table with an empty chair and start playing any of three variations available: Points, Pools or Deals. With minor changes depending on the modality chosen, we basically have to create groups of three or four cards in the form of straights or threesomes/foursomes to get rid of them by putting them on the table, and placing our left-over cards on the groups made by our rivals. Once we've understood the concepts and we master the rules, we can take part in tournaments and games with real-life money. However, all our earnings will be in rupees. Thrill, fun and fulfillment - all in one place. Challenge yourself and compete with real players on the best rummy app. We are RummyCircle. However for every withdrawal they will charge you Rs 15. One more thing, which I am not able to understand is, you can not withdraw your money without playing. Suppose, you have deposited Rs 1000 and after deposit if you don't want to play, they should have option to withdraw the money after deducting their charge of Rs 15. But here you can not withdraw that Rs 1000/- until and unless you play. And once you start playing they will ensure you that you will not withdraw even your deposit amount. You will certainly lose. Writing this review after finding the scam behind the RummyCircle. I was placed in an empty table so RummyCircle forced me to leave that table. Once I left that table and joined another table I'm unable to play as my amount is less than the required amount to play. So I started thinking how it would happen!!! Now I'm alert. Same happens again and now I'm smart I keep my eye in the amount. Once I leave the table (since in RummyCircle forced so) RummyCircle forced 20%. Now I went to transaction history but there is no transaction history I RummyCircle. So I allegedly lost more than 400\$ simply by their scam. If you play with small amounts they will get to know easily. If you invest high amount definitely you will never notice the scam as you will not keep your eye. Usually we will keep eye once we lost or won but we will never keep an eye while leaving the table - Moreover it doesn't happen every time. They had very good algorithm to cheat you. There will be no fair play in rummy circle.. I played rummy in

1. jungle rummy 2. Oson rummy3. Rummy circle and many more Rummy circle is having worst fair play compared to others.. I never faced any scam in jungle rummy. I invested around 8k and won more than 20k in jungle rummy. For 2 players RummyCircle will have more than 2 decks which is against the fair play. They don't even know the rules... You will find this scam once you gets affected Hi Abinesh, we'd like to help. Kindly send us the details of your issue from your registered email address with the reference number RCB2905 in the subject line of your email. Please rest assured that being a law-abiding organization, we believe in Fairplay and would always provide our players with an unadulterated Rummy experience. Looking forward to your email. Thanks!
